

# SecuriFire 2000 & SecuriFire 1000.

Product presentation.

 **SECURITON**  
For your safety

# General.

- Compact system
- Can be networked
- SecuriLine eXtended (2 loops)
- For controlling single zone extinguishing systems
- State-of-the-art Multi-Layer Technology (Microvia)
- Clear stress-free indication and operation
- Multilingual
- Can be configured simply and in a structured manner by PC software
- Approved and certified

# Overview SecuriFire 2000 & 1000

## SecuriFire 2000

- 2 loops with 4 loops optionally
- 2 monitored outputs for alarm transmission systems & alarm systems
- 5 relay outputs
- MMI-BUS & fire brigade panel interface
- Can be networked

**B6-SCP2010**

with full door

**B6-SCP2020**

with operating panel

**B6-SCP2030**

with operating panel and printer

**B6-SCP2040**

with operating panel, printer and cut-out

## SecuriFire 1000

- 1 loop
- 2 monitored outputs for alarm transmission systems & alarm systems
- 5 relay outputs
- MMI-BUS & fire brigade panel interface

**B6-SCP1020**

with operating panel

**B6-SCP1030**

with operating panel and printer

## SecuriFire 2000

- 2 loop control unit with optional expansion to 4 loops
- Can be networked as a 2 loop version
- Device bus for connecting remote operating panels, fire brigade control panels and floor plan panels
- Interfaces for transmission and alarm systems, relay outputs, monitored inputs and outputs
- Simple to operate configuration and commissioning tools
- Event memory for 65,000 messages in real time
- Remote system access over TCP/IP
- Can be connected to superordinated computer systems or fire detection management systems over serial data interfaces
- Comprehensive, integrated overvoltage protection concept

# SecuriFire 2000 Topology

# SecuriFire 1000

- 1 loop control unit
- Device bus for connecting remote operating panels, fire brigade control panels and floor plan panels
- Interfaces for transmission and alarm systems, relay outputs, monitored inputs and outputs
- Simple to operate configuration and commissioning tools
- Event memory for 65,000 messages in real time
- Comprehensive, integrated overvoltage protection concept

# SecuriFire 1000 Topology

# Extinguishing panel SecuriFire 2000

- Automatic electronic control and delay unit for controlling an extinguishing zone
- can also used as a combined fire alarm and extinguishing system control unit or as a control unit
- Simple to operate configuration and commissioning tools
- External device bus for connecting remote operating panels, fire brigade control panels and floor plan panels
- Event memory for 65,000 messages in real time
- Comprehensive, integrated overvoltage protection concept

# Extinguishing panel SecuriFire 2000 Topology

# Double security thanks to software redundancy

- in the event of unforeseen software errors occurring, an ordered emergency operating mode is automatically started
- In emergency operating mode, only the part of the operating program that is absolutely necessary is loaded during start up
- This does mean that the range of functions and operations is restricted as a consequence, but on the other hand ensures that the system continues to function properly with regard to alarms and alarm forwarding
- Depending on the national installation guidelines, the SecuriFire is also suitable for monitoring areas of more than 3000 m<sup>2</sup>
- The type and scope of emergency operation can be configured

# Operating Panel MIC 711

- 5.7" TFT-colour display
- Functional keys and scroll wheel
- No text, only symbols on the operation panel
- 4 different languages online changeable
- Can also be operated as a networking operating panel within a SecuriLan
- Interface for printer
- EPI-Bus (extension bus) to connect up to 3 different modules (optional)
- Unified operational concept between SecuriFire and SecuriSafe

# Multilingual user interface

TFT Colour display

Functional  
keys

Numeric keys

Zoom  
key

Collective LED  
indications

rotating  
menu wheel

# Mechanical construction SecuriFire 2000/1000

**Back Panel**

**Main processor unit  
& power supply**

**Module cover &  
rechargeable cells**

**Cabinet with operating  
panel and log printer**

Case dimensions: 445 x 400 x 140 mm

# SecuriFire 2000 connection technology

- Clear construction
- Only uses plug and socket connections
- No direct wiring on modules
- Modules are simple to change or extend
- Increased EMC protection for modules with a front plate
- Power supply unit with 5 outputs for external devices

# EMC and Overvoltage protection

As a result of the comprehensive integrated overvoltage protection concept pursuant to EN50130-4 (EMC) and EN 50082-2 additional measures, e.g. spike suppressors etc., are no longer necessary.

- Fully enclosed electronics
- Modules with sheet metal cover
- Earthed metal case
- Back wall with cable inlet and strain relief
- Overvoltage protection with broadband decoupling of the supply voltage, network filter and protective diodes
- Shielded cables
- Connection for antistatic set

# SecuriFire 2000 extra modules.

The following modules can be fitted as necessary to the main processor unit of the SecuriFire 2000:

## **B4-DAI2**

### **Loop circuits**

2 loop circuits or  
4 stub lines

## **B4-EIO**

### **Inputs/Outputs**

8 primary outputs,  
monitored for short circuits,  
wire breaks and overloads  
- 10 HX130 detector zones  
- primary inputs or  
- VdS conformant  
extinguishing interfaces

## **B4-USI**

### **Universal Interfaces**

1 x RS485  
1 x RS232/RS485  
1 x PCM CIA modem

## **B6-NET2 485**

### **Network module**

Transmission type: TCP/IP  
Direction: bidirectional, full-  
duplex  
1 x Ethernet 100 Base TX  
LAN interface 100 Mbit/s  
2 x RS485 interfaces 2.5  
Mbit/s with redundant  
cabling

## **B6-LAN**

### **Network module**

Transmission type: TCP/IP  
Direction: bidirectional, full-  
duplex  
2 x Ethernet 100 Base TX  
LAN interface 100 Mbit/s
